Documentation of the Qt-Project "Homework Task - CPU Info"

Author: Sebastian Mörz
Date: April 13th, 2017

Notes:

- **This is my first work with Qt/QML. Please consider this when evaluating this project.**

- **Please note also that the orignial deadline was May 3rd, 2017.**
  I was informed about the new deadline (April 13th) on April 12th, leaving me 28 hours for the entire project.

- **The project is currently not finished**

Description of Main Task:

- read the Linux CPU information from /proc/cpuinfo using Qt C++
- display the information using QML / QtQuick (not Qwidget)
- use Qt 5.4 or later
- provide documentation
- upload to GitHub and send link to recruiter

Additional Documents:

- Backlog: see "ProductBackLog.pdf"

- User View: see "ProductBackLog.pdf"

- Project Structure: see "ProjectStructure.pdf"

- Testing: see "Testing.pdf"
